

MOSN-149

TO: Distribution  
FROM: J. W. Waclawski  
DATE: February 2, 1971  
SUBJECT: Dump w\*, Save and Restor Deaths

This document obsoletes MOSN-39

When the Dump w\* dies:

The operator will have to make a decision at this point to either continue the Dump w\* or to dump the Bos segments controlling Dump w.

Dumping Bos Segments of Dump w\*, Save and Restor

1. At Processor TRA to BOS via Inst. 2 717 200 (xed 2). That is by putting exec.flt. switch up entering 2 717 200 in Inst. and hitting execute.

Reset 2 717 200 after TRA

2. Type: Dump

Reg\* Dump of xxxx problem

Segs 1, 2, 3, 4, 5 and 6 (each segment done separately)

ABS 0 4000

EOF

QUIT

SALV

Continuance of Dump w\*

1. TRA to BOS with exec.flt. switch up and Inst. 717 200 in switches by hitting execute.
2. Type: Dump w\* comments.
3. If Dump w\* dies again go to steps outlined above for dumping Bos segments.
