BB.5.00, 3/30/67)

Identification

Multics Name Registry
R. M. Graham

Purpose

A number of different names and standard symbols are referred to at various times during the running of a Multics process. In order to avoid inevitable conflicts, a registry of these names and symbols is maintained in the MSPM, by the editor.

Contents of the Registry

Each subsection of BB.5 is a registry for a particular class of names or symbols. Following is a table of contents for these subsections.

- BB.5.01 Reserved Segment Name Suffixes
- BB.5.02 Reserved External Symbols
- BB.5.03 Software Simulated Faults
- BB.5.04 Reserved Option Names
- BB.5.05 Fault Assignments
- BB.5.06 Segment Name Registry
- BB.5.07 Reserved Stream Names
- BB.5.08 Reserved Condition Names
