Identification

BOS bootload
Boot
S. D. Dunten, T. H. Van Vleck

Purpose

The BOOT command of BOS starts a bootload run of the Multics system by simulating the action of the GIOC diode program (BC.4.01).

Usage

The following BOS command starts a bootload run:

    BOOT -n-

Tape $n$ is rewound, core is cleared, and then tape $n$ is started bootloading.

$n$ must be less than 5 since the bootload will use tapes $n$ through $n + 3$.

The default $n$ is zero.
